

# hacker-proof holiday hacks

Be careful with public WiFi - check twice to make sure the network you're logging into is legitimate.

Use a private secure network or mobile data only for anything sensitive, like shopping online or checking your bank account.

Keep your technology with you at all times.

Shop safely—only use websites with “https” in the URL.

Turn off your Bluetooth when you're not using it.

And whatever you do, watch out for South Pole elves.

Merry Christmas from the
