# THE MALWARE MOB

Nice computer you have there. It'd be a shame if something were to...happen to it.
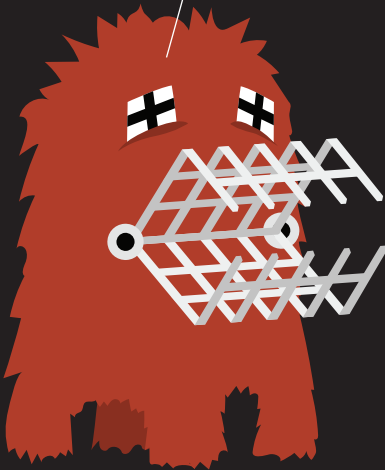

WORM

Spreads like a fungus throughout computers and systems, bogging down processes along the way

RANSOMWARE

Encrypts your files and holds them hostage until you pay up

VIRUS

Enters your device and replicates rapidly. Effects range from irritating pop-ups to devastating shut-downs.
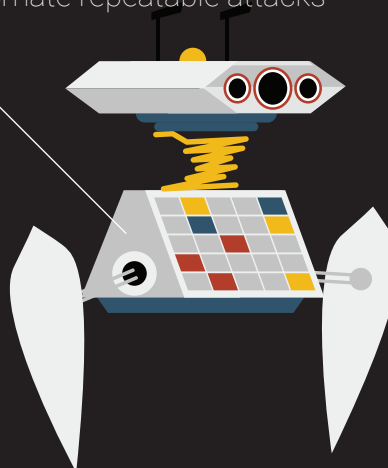

BOT

Built to infiltrate, propogate, and automate repeatable attacks

TROJAN

Impersonates legitimate software to create a gateway for hackers

SPYWARE

Gathers data on you and your device usage, paving the way for theft and blackmail
